

Hitmate CWES2 Pairing Instructions

INTRODUCTION

This document describes the 2nd generation Completely Wireless Epee System (CWES2). If you have the 1st generation CWES, please refer to the CWES User Guide.

PAIRING

The CWES2-2 and CWES2-3 are shipped already paired with one Plugin configured as red (red label) and the other as green (green label). If you would like to swap the colour assignment, pair either Plugin with a Plugin from another set or pair to a Repeater, then follow these instructions. Steps 2 and 3 must be completed within 3 seconds or the red Plugin will timeout. It is therefore best if one person performs the pairing operation.

1. Switch on the Repeaters (optional) and then both Plugins.

2. Choose which Plugin will be red and press and hold the switch until the red LED illuminates.

3. Briefly press the switch on the green Plugin until the buzzer sounds.

The red LED on the red Plugin will switch off and the green LED will illuminate to indicate the pairing between the Plugins is complete. The red LED on the red Plugin will illuminate again to show that it is ready to pair to an optional Repeater. If no Repeater is required the red Plugin will switch off after 3 seconds.

4. Press the red button on the Repeater (optional) until the buzzer sounds.
